Summary

Motivated Computer Science student with strong proficiency in Java and the MERN stack. Experienced in developing secure, scalable web applications and RESTful APIs using MongoDB. Also have academic exposure to Computer Networks (OSI, TCP/IP, IP addressing) through coursework and NPTEL certification. Eager to contribute to real-world software development.

Education

B.Tech – Computer Science (Artificial Intelligence) , Parul University, Vadodara CGPA: 7.01 / 10	2022 – 2026
Higher Secondary (12th) , Narayana Jr & Sr College, Visakhapatnam Percentage: 93.90 / 100	2020 – 2022
Secondary School (10th) , Keshava Reddy School, Srikakulam Percentage: 93.16 / 100	2019 – 2020

Projects

Blockchain-Based Healthcare Data Security System

- Developed a blockchain-based healthcare data management system ensuring secure, tamper-proof storage using SHA-256 hashing.
- Implemented patient record creation, validation, and block linking to maintain transparency, integrity, and immutability of medical data.
- Designed role-based access for doctors and patients, improving secure information sharing without central dependency.
- Tech:** Blockchain, SHA-256, Cryptography, Python, Flask.

MERN Accommodation Listing Platform

- Built a full-stack accommodation listing platform using the MERN stack with secure user authentication and session management via Passport.js and MongoStore.
- Implemented CRUD operations, review system, dynamic EJS components, and category-based filtering for streamlined user experience.
- Designed and structured RESTful APIs, controllers, middleware, and MongoDB schemas using Mongoose for efficient data handling.
- Tech:** Node.js, Express.js, MongoDB, Mongoose, EJS, Passport.js, JavaScript.

Tender Management System

- Developed an online platform for vendors to view, submit, and manage tenders digitally in a centralized web-based system.
- Implemented frontend using HTML, CSS, Bootstrap; backend using Java; MySQL as database for efficient data storage and retrieval.
- Automated report generation for awarded tenders to enhance transparency, efficiency, and streamlined administrative operations.
- Tech:** Java, J2EE, JSP, JDBC, MySQL, Bootstrap with integrated database connectivity and dynamic web.

Technologies

Languages: Java, Python, JavaScript.

Frontend: HTML, CSS, React.js.

Backend: Node.js, Express.js, REST APIs.

Databases: MongoDB, SQL.

Tools/Version Control: Git, GitHub, MS Office, Excel, Word.

Networking: OSI Model, TCP/IP, IP Addressing, DNS, DHCP, TCP/UDP Protocols, HTTP/HTTPS.

Certificates

Computer Networks – NPTEL	2024
Oracle Cloud Infrastructure 2025 Certified Data Science Professional	2025

Extra-Curricular Activities

- Member of Coding Club**
Participated in peer learning, coding challenges, and collaborative projects.
